

The Open GIS Stack

“A maximalist docker based server side geospatial stack”

1.

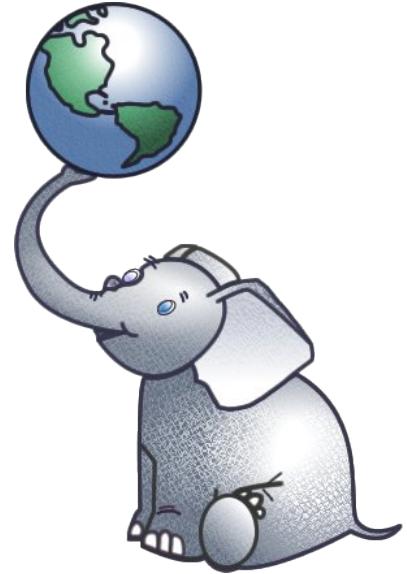

Deploying your stack

“from zero to hero”

2.

Connecting to PostgreSQL

“select * from postgis”

3.

in review

Open Street Map Data

“`docker-compose --profile=osm up -d`”

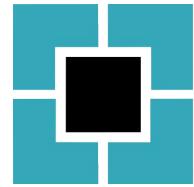

4.

Publishing a QGIS Project

“scp all the things”

MapProxy

5.

Mapproxy

“save cash use a cache”

6.

GeoServer

“because nice people use standards”

7.

Mergin

“`docker-compose --profile=mergin up -d mergin-sync`”

GitHub

<https://github.com/kartoza/OpenSource-GIS-Stack>

“You too can be a maximalist!”
